

INFORMATION FOR PATIENTS

Compression hosiery

This leaflet is intended as further help to patients who have been supplied with compression hosiery to use during the day. If advice in this leaflet differs from what you have been told in clinic, wear as directed by the orthotist as this will be specific advice to your individual needs.

Your compression hosiery

Compression hosiery should be a close secure fit and not loose. It should not be painful to wear. Putting on hosiery may be difficult to get used to and you will need to persevere. If it does not get easier, contact the department for a review.

Please read the manufacturers' leaflet as it will provide detailed help on applying, removing, and caring for your garment.

For maximum benefit, the hosiery should be applied first thing in the morning and removed about 7pm in the evening.

Never wear the hosiery in bed.

To begin with

You will get used to the compression hosiery gradually as the tension can be uncomfortable to begin with.

Ensure the foot piece is in place before pulling the hosiery up and make sure there are no creases.

Care should be taken with rings and rough fingernails. Household rubber gloves may help you put on stockings.

Any red marks should fade after 15 minutes of removing the stockings. If they do not fade please contact the Orthotic Department for a review appointment and leave the stockings off.

General wear

If the size of your legs alters significantly, please contact the department for a review appointment. It may take up to eight weeks to know whether they are helping with your initial problem, so you need to persevere and give them time to work.

Compression hosiery needs to be reviewed and renewed every six months. Please contact the hospital for a review appointment in five months' time.

If you develop a severe pain in your calf, stop wearing the stocking. Seek advice from your referrer immediately.

Eligibility

The orthotist is responsible for the initial assessment and provision for all types of compression hosiery. After this period, it is expected that you are issued with an FP10 prescription by your GP for further garments.

Compression hosiery needs to be in good condition and renewed every six months for maximum benefit. Replace it earlier if it has a ladder.

Custom

If you have been issued with a custom size or type, you will need to request replacements from Orthotics Services.

You should request new hosiery every six months. You will not need to be seen by the orthotist unless you have any problems. It is recommended that you attend every two years to be re-measured.

Please keep this leaflet safe for future use. You are now able to contact the department directly for orthotic care as required. If you need a review appointment, or if the orthosis requires servicing or replacement, you **do not** need to be referred again.

If there are new symptom(s)/condition(s) that are unrelated, a new referral will be required to be assessed for further orthotic management.

Prescription fee

You may be exempt from paying the NHS prescription charge, please ask for details. More details on prescription fees are available from:

www.nhs.uk/nhsengland/Healthcosts/pages/Prescriptioncosts.aspx
