Facet nerve injection

Other _____

- It is advisable that you have someone with you at home for 24 hours.
- It is recommended that you relax and limit your activity for the remainder of the day.
- Do not drive a car or operate machinery for 24 hours.

- Keep the injection site dry and inspect the site daily for two days. If you have a dressing or plaster, please remove it later on today.
- You may shower today. No soaking baths, hot tubs or swimming pools for 24 hours.
- Some discomfort may occur at the injection site. You may:
 - Take your usual pain killers.
 - Apply an ice pack for 30 minutes, two to three times a day for the first 24 hours if needed.
- If you are given steroids in your injection, it may take three to five days for the steroid medication to respond.

You may notice a worsening of your symptoms for few days after the injection. Please continue your usual pain killers.

- If you normally take a blood thinning medication like Warfarin and stopped before the treatment, please discuss with your consultant about restarting the medication.
- Contact your GP or the Pain Clinic on telephone 01623 622515, extension 3049 or 6153, during working hours (Monday to Friday, 9am to 5pm) if you are experiencing the following:
 - New onset of persistent severe pain not settled with pain killers.
 - Headache that does not go away with medicine, is worse when sitting or standing up, and is greatly relieved upon lying down.
 - Chills or high fever.
 - Redness, swelling tenderness, or drainage at the injection site.

Please go to your nearest Emergency Department if you are experiencing new onset of an inability to feel or move your legs and/or loss of bladder or bowel control.
