

INFORMATION FOR PATIENTS

Collection of a 24 hour urine sample

Collect all urine passed during 24 hours. The collection can start any time of the day, but it is usually most convenient to start in the morning, for example 8am.

Starting the collection

At 8am pass all urine into the toilet and discard in the normal way. Write this time and date on the label of the container. Then collect all urine for 24 hours and put it in the container. If you need to open your bowels, collect urine first so that none is lost.

Finishing the collection

At 8am next day, pass all urine and put into the container. The collection has now finished. If you mistakenly discard a specimen, this will make the collection incomplete. Return the container and obtain a new one with which to start again.

Return the sample container and the form the doctor/nurse gave you to the Pathology Department at either King's Mill Hospital or Newark Hospital.

Where do I deliver the sample to?

The Pathology Department at King's Mill Hospital is found by following the signs to the Bereavement Centre and the MRI Scanner. The department's main door is situated to the left near the top of the corridor.

There is a free 15 minute drop off/collection zone outside King's Mill Hospital's main reception and volunteers are available in the entrance foyer to give directions.

The Pathology Department at Newark Hospital is situated on the ground floor next to the Mercia Doughty Preoperative Assessment Unit. When you arrive at Pathology you should take your sample to the delivery hatch at the reception. The staff will check your details and take the sample from you.

You are free to leave once you have handed in your sample as your results will be forwarded to your referring doctor.

Site maps and directions to King's Mill Hospital and Newark Hospital can be found on the Sherwood Forest Hospitals NHS Foundation Trust website – please see 'Further sources of information'.

How do I get my results?

Your results will normally be sent back to your referring doctor (GP or consultant) approximately 14 days after your test. Results are not given out over the telephone in order to protect patient confidentiality.

What happens to my sample after it has been tested?

Once your sample has been tested and a result has been sent back to your referring doctor, the remaining fluid is incinerated.

Summary of instructions:

1. Empty your bladder.
2. Pass all urine for next 24 hours into the container.
3. Label it with your name, address and time of collection.
4. Return the collection with the request form attached.
