6. Timely Access 6.6.1 Establish a retrospective clinical patient pathway review audit. Review of ten sets of notes per month within three separate specialities commencing with highest risk specialties	Green Completed 31/12/15	Blue / subject to CQC Confirmation
Detail:		
<p>There have been data quality audits of 10 sets of case notes in ophthalmology, gastroenterology, cardiology, neurology and ENT. There is a plan to continue to undertake these audits, one speciality per month.</p> <p>Reports have been written with recommendations for four of those specialities and fed back to the divisions.</p> <p>As a consequence of work that has been undertaken in the organisation in relation to training and improved management of the whole RTT process, SFH is now able to demonstrate an improvement in its validation performance, reconciliation of OP appointments, increasing utilisation in OP clinics and theatres and we are consistently achieving the RTT target.</p>
