

Action: 6.6.2 - Understand the capacity requirements of Paediatric Allergy Clinic		Current BRAG Rating	Recommended BRAG Rating
		Completed	
Detail:			
There is 2 Consultant PA and 3 nursing sessions allocated to this weekly clinic.			
Evidence:			
Meeting with Dr Michael Yanney and Dr Vibert Noble to review capacity for allergy clinics led to identifying additional follow up slots which has resulted in a backlog of 5 patients in November, 4 patients in Dec and 8 in January requiring FU appts. Therefore currently we only have 9 patients overdue. A locum paediatrician has been appointed who will be doing 4 additional allergy clinics in December resulting in no outstanding new appointments waiting to be booked in a breach position.		<div style="text-align: center;">  FW Outstanding paed allergy.msg </div> <div style="text-align: center; margin-top: 20px;">  Meeting 3 December re Allergy Clinic Capa </div>
