Number of Deaths & Reviews by Quarter

Key Learning/Themes identified - now incorporated into the Quality Priority Plan 2018/21

| | |
|------------------------------------|--|
| Implementation of the ReSPECT Tool | <p>Throughout 2017/18 the two main themes from the Structured Judgement Reviews carried out within specialties identified the</p> <ul style="list-style-type: none"> i) the lack of confidence in clinical staff in having early discussions with patients and families of their wishes when a patient is at the end of life or no longer able to make decisions ii) the timely recognition and response to the deteriorating patient <p>The implementation of the ReSPECT Tool in April 2019 will fully support both these issues</p> |
