Healthier communities, outstanding care

Sherwood Forest Hospitals
NHS Foundation Trust

We approach the next five years from a position of strength. Our history is as a provider of healthcare, but we recognise that we have an opportunity and a responsibility to support our local population in becoming healthier. That's why our vision over the next five years is to see **healthier communities experiencing outstanding care**.

This is not something we can achieve on our own. It needs to be a partnership between everyone in our community – those who work in health and social care, those who use our services and those who may need our services in the future. Together with partners we will focus on prevention and ensuring people receive the right support in the home, community and in hospitals.

And that's why we had 750 conversations with you - members of the public and staff – in one of our biggest ever engagement exercises to see how we could partner together and what we will prioritise and achieve in the next five years of our journey.

Please note a simplified map highlighting our three sites will be included in the final version
