Trust Board - November 2024

Acronyms

DNA – did not attend (the appointment)

MECC – making every contact count

NHS IMPACT – improving patient care together (NHS improvement approach)

Executive Summary

The 'Improving Lives' strategy sets out how the Trust intends to adapt and change to meet the challenges it faces over the next five years. The strategy was developed with input from members, patients, our population and our people. It was approved and launched on 1 April 2024.

The following report was presented to Board in November and is the first update of delivery for the period April to September 2024. Governors may find it helpful when facilitating discussions with trust members and our local population.

The Improving Lives vision is to deliver consistently outstanding care by compassionate people, leading to healthier communities. To achieve this vision the Trust has six strategic objectives, which are:

- Strategic objective 1 Provide outstanding care in the best place at the right time
- Strategic objective 2 Empower and support our people to be the best they can be
- Strategic objective 3 Improve health and wellbeing within our communities
- Strategic objective 4 Continuously learn and improve
- Strategic objective 5 Sustainable use of resources and estate
- Strategic objective 6 Work collaboratively with partners in the community

Underpinning the strategic objectives the Trust has five supporting strategies, which provide greater detail on the principles and actions that deliver against these objectives and collectively achieve the Improving Lives strategy. The supporting strategies are:

- Clinical services strategy
- Quality strategy
- People plan
- Partnership strategy
- Finance strategy

These supporting strategies have been reviewed in Board committees during September and October against expected progress, and this has been amalgamated into demonstrating delivery of the overarching Trust strategy 'Improving Lives'.

This Board report brings together progress into a summary of delivery aligned to each strategic objective.

NHS organisations have faced significant challenges during April to September but the Trust has continued to focus on its longer term goals and has many achievements to be proud of. The Trust has demonstrated delivery against every strategic objective making improvements to the lives of our patients, our people and the local population.

During the next six months, there will be a refresh of the quality strategy and the people plan, and the finance strategy will be finalised, which will further align to delivery of the Trust strategy.

A further review of progress and impact of the strategy's deliverables will be presented to the Council of Governors in May 2025.

The Council of Governors is asked to NOTE the report.
