

Jan-23	Amount of Call Outs	Reasons	Actions taken
Kings Mill Hospital	2	Flies (I)	Upon inspection, flies were seen flying around the corridor leading to the union block. Affected areas have been treated with a suitable insecticide to help control any flies. No further action required at this time.
		Rats (I)	Upon inspection, burrowing was found going into the vegetation I this area. Unfortunately I wasn't able to carry out a treatment as no pest control measures are in this area. Bait stations have been put on order. Recommendations have been made and discussed with site.

Feb-23	Amount of Call Outs	Reasons	Actions taken
Kings Mill Hospital	2	Rats (I)	Upon inspection, no rat was found internally. however around 26 holes were found underneath the cabin and this is possibly where the rat gained entry, these holes have been temporary proofed and temporary baits have been placed underneath the cabin. Further visits to continue.
		Shrubbery	Attended site today to inspect work being carried out on removal of shrubbery as requested.

Mar-23	Amount of Call Outs	Reasons	Actions taken
Kings Mill Hospital	1	Mice (I)	Upon inspection of this area bait take and droppings by mice were found. Possible ingress point in the open shutter door that is always left open. Temporary radars have been placed in this room and baits have been replenished with a suitable rodenticide to continue to monitor and control any mice. A further follow-up visit will be carried out next week.
Mansfield Community Hospital	2	Dead rat/mice	Upon inspection of the area there was no evidence of any activity in the form of rodents but a pipe was found behind a unit I'm not sure if this may be the problem but also the is a drain pipe at the back of the unit. No follow ups needed at this time.
		Rats (I)	Upon inspection, no evidence of pest activity was found, however, temporary bait has been placed in the roof void to monitor and control any pests. A further follow-up visit will be carried out next week.

May-23	Amount of Call Outs	Reasons	Actions taken
Kings Mill Hospital	2	Fungus Gnats (I)	Bleach cleaning the drains will be effective in removing the source of food and killing any remaining flies in the drain system, with the fly unit outside the locker room catching any remaining. Follow ups will not be required as long as the drain system is cleaned, if there is still an issue in a weeks time, place another callout and a technician will be with you to assist.
		Fungus Gnats (I)	Need to continue for a few more days bleaching the drains to remove any more gnats or organic matter, if there is still an issue next week then a drain survey will need to be carried out to ensure there is no blockages in the drains causing a sustainable food source for the gnat pests. No further actions required until called out again.

Newark General Hospital	1	Rats (I)	Today I have inspected the area and have found low levels of rodent droppings, evident of Rat (Rattus Norvegicus) activity. Today I have placed 2x Snap Traps with attractant inside.

Jul-23	Amount of Call Outs	Reasons	Actions taken
Kings Mill Hospital	4	Damaged EFK	An attempt to fix the efk has been made but has been unsuccessful. Staff have been informed that a new efk will need to be ordered and a lead has been placed.
		Rats (I)	Area was inspected, and no evidence could be found. With no burrows being present, and no bait take or autogate triggers in the bait boxes across the car park.  As the site is a nursery, no baiting can take place on the grounds due to children being present  Staff on site have been advised stay extra vigilant with regards to food outside and not to feed any birds for a few weeks in order to not encourage any pest activity. They have also been advised to keep doors closed whenever possible.
		Damaged EFK	The unit has had both tubes replaced today and is still not working therefore I recommend a replacement is order.

		Mice (I)	The area has been checked and a gap was found behind the pipework which needs to be proofed. Temporary prep has been placed down to help deal with pest activity.
Mansfield Community Hospital	0	N/A	N/A
Newark General Hospital	2	Rats (I)	2 snap traps, tox grain and tracking dust have been placed in effected areas, housekeeping is clean and tidy, external bait points around the boiler area have been checked and all are in good clean condition for the monitoring of pest activity.
		Ants	A call out visit was carried out in response to a report of any activity. Area has been sprayed using phobi caps to help prevent ant infestations. Please stay away from area for up to 4 hours. . Rentokil will follow up on this pest activity until control is achieved

Aug-23	Amount of Call Outs	Reasons	Actions taken
Kings Mill Hospital	3	Rats (I)	The site has delt with the issue and rentokil has inspected the area and no ingress points were found. Please follow rentokil recommendations and rentokil will continue to monitor the site for future pest activity.
		House Flies (I)	The roof void has been inspected and no issue was found except for a few small gaps in the ceiling. A spray was carried out externally to treat the external flies. Rentokil will return to site next week to asses and treatment the site.
		Garden Ants (I)	The toilet has been inspected and some garden ants was found. However due to it being on a ward toilet I have been unable to treat chemically due to potential risk of contamination. I have placed multiple insect detectors down and I will return next week to monitor the site.
Mansfield Community Hospital	1	Rat activity	This site has been checked and no signs of rat activity was found. As a precaution 2 rat snap traps have been placed down and the site will be reviewed next week.
