

INFORMATION FOR PATIENTS, PARENTS, GUARDIANS, CARERS

Fabric gaiters

This leaflet is intended as further help to parents, guardians, and carers whose child uses fabric gaiters. Gaiters are used to support the knees to stop them bending when standing, for use in bed, or long sitting to give the hamstrings a stretch.

Step by step guide:

1. Undo the Velcro straps and slide the open gaiter under the leg. Most gaiters have straps on the inside that pull to the outside.

2. Wrap the side without the straps over the knee first. The bar should rest on the side of the knee. Adjust the gaiter position if not.

Wrap the strap side over the leg so that the other bar rests on the side of the leg also. Pull the fabric firm and take out as much of the creases/folds as possible.

3. Untangle the straps and lay them out straight.

4. Working from the bottom, wrap the straps around and underneath the leg. They must be firm but not tight.

If the knee is tight, keep adjusting and pull the creases out of the material.

5. Once all the straps are secure the side bars should follow the contour of the leg on either side. If the gaiter is twisted, one bar will be further forward than the other.

If the knee is tight and flexed, you will need to adjust the first straps again. If you experience any problems, please contact your technical assistant at the Children's Therapy Centre to request a review appointment.

Eligibility

One gaiter/pair of gaiters will be supplied initially. As this wears out, we will replace it. The life span of the gaiter will depend on several factors. If you wish to have more braces, please contact the department for a quote.

Please keep this leaflet safe for future use. You are now able to contact the department directly for orthotic care as required. If you need a review appointment, or if the orthosis requires servicing or replacement, you **do not** need to be referred again. If there are new symptom(s)/condition(s) that are unrelated, a new referral will be required to be assessed for further orthotic management.
